Insertion sort   P41412_en

Write a procedure that sorts v in non-decreasing order using the insertion sort algorithm.

Interface

C++	**void** *insertion_sort* (**vector**<**double**>& v);
C	**void** *insertion_sort* (**int** n, **double** $v[n]$);
Java	**public static void** *insertionSort* (**double**[] v);
Python	*insertion_sort* (v) # returns None
	insertion_sort (v: *list*) $\rightarrow$ *None*

Observation

You only need to submit the required procedure; your main program will be ignored.
